The Third World Congress on Formal Methods (FM 2019) took place during October 7–11, 2019, in Porto, Portugal. The congress comprised nine conferences: the 23rd International Symposium on Formal Methods (FM 2019); the 29th International Symposium on Logic-Based Program Synthesis and Transformation (LOPSTR 2019); the 13th International Conference on Mathematics of Program Construction (MPC 2019); the 21st International Symposium on Principles and Practice of Declarative Programming (PPDP 2019); the 19th International Conference on Runtime Verification (RV 2019); the 26th International Symposium on Static Analysis (SAS 2019); the 13th International Conference on Tests and Proofs (TAP 2019); the 7th International Symposium on Unifying Theories of Programming (UTP 2019); and the 13th International Conference on Verification and Evaluation of Computer and Communication Systems (VECoS 2019). The conference also included a Doctoral Symposium, an Industry Day, 2 festschrifts, 16 workshops, and 5 tutorials. In total there were 630 registered participants from 43 countries, 381 presentations from 821 authors, 44 invited speakers, and 13 tool exhibitors. The 16 workshops emerged out of 18 workshop proposals. Three workshops, the Second International Workshop on Dynamic Logic, New Trends and Applications (DaLi 2019), the Third International Workshop and Tutorial on Formal Methods Teaching (FMTea 2019), and the 5th Workshop on Formal Integrated Development Environment (F-IDE 2019), had their proceedings published separately. This two-volume book consists of the proceedings of the other 13 workshops.

**Volume 1:**

**AFFORD 2019**

The Third Workshop on Practical Formal Verification for Software Dependability

**DataMod 2019**

The 8th International Symposium From Data to Models and Back

**FMAS 2019**

The First Formal Methods for Autonomous Systems Workshop

**FMBC 2019**

The First Workshop on Formal Methods for Blockchains

**FMIS 2019**

The 8th International Workshop on Formal Methods for Interactive Systems

**Volume 2:**

**HFM 2019**

The First History of Formal Methods Workshop

**NSAD 2019**

The 8th International Workshop on Numerical and Symbolic Abstract Domains
OpenCERT 2019
The 9th International Workshop on Open Community Approaches to Education, Research and Technology

Overture 2019
The 17th Overture Workshop

Refine 2019
The 19th Refinement Workshop

RPLA 2019
The First International Workshop on Reversibility in Programming, Languages, and Automata

SASB 2019
The 10th International Workshop on Static Analysis and Systems Biology

TAPAS 2019
The 10th Workshop on Tools for Automatic Program Analysis

The diversity of the workshop themes reflects the evolution that formal methods of software development have taken since the first World Congress on Formal Methods in 1999 (Toulouse, France) and the second in 2009 (Eindhoven, The Netherlands). Each workshop has its unique history and style that was left up to the workshop organizers to maintain. We are pleased to have four workshops for the first time: FMAS, FMBC, HFM, and RPLA. In total, 123 papers were accepted after a first round of reviewing for the presentation at FM 2019. Of those, 108 were submitted for a second round of reviewing after the congress and 68 selected for inclusion in these proceedings. The workshop organizers ensured that all papers received at least three reviews. Nine invited abstracts, two invited papers, and one workshop summary are included as well.

We are grateful to the workshop authors, the workshop organizers, the Program and Organizing Committee members of the workshops, the local organizers, the sponsors of the congress, and everyone else involved in the 34 events of the congress for the concerted effort in putting together such a rich program.

Finally, we thank Springer for their immediate willingness to publish the collected FM 2019 workshop proceedings in the LNCS series and their support in the editing process.
