SCIENTIFIC EMPLOYMENT – Technological Interface Centres

HIRING OF 1 (ONE) DOCTORATE

INESC TEC - Institute for Systems and Computer Engineering, Technology and Science, a private research institution, is accepting applications for hiring one Doctorate Researcher with an employment contract subject to an uncertain resolatory term, under the scope of the CIT Project, with the reference CIT/2018/17 and funded by FITEC through the Interface Programme.

The hiring shall be governed by the Decree-Law 57/2016 dated August 29, which approves the Legal Framework on the Scientific Employment, as amended by Law No 57/2017 of 19 July, hereinafter referred to as “LFSE”, by the Regulatory Decree No. 11-A/2017 dated 29 December, by the Labour Code and by other legislation applicable to individual employment contracts, as well as the internal rules of INESC TEC, also considering the specific conditions provided for in the legal regime mentioned above for hiring doctorates under the projects that are funded by public funds.

In accordance with Article 6 (1) (b) and (3) of the LFSE, the employment contract will be subject to an uncertain resolatory term, without prejudice to INESC TEC being able, at any time, to integrate the researcher in its permanent staff.

HIRING SALARY LEVEL

In accordance with Article 15 of LFSE and Article 2 of the Regulatory Decree mentioned above, the monthly salary to be awarded is €2,385.80, which corresponds to the paying position 2 of the initial level, as provided by the table included in Article 2 (1) of Regulatory Decree No. 11-A/2017 dated 29 December.

FUNCTIONAL DESCRIPTION

Identification of funding opportunities and development of partnerships and *networking*, support the coordination and execution of R&D and knowledge valorisation projects, support the preparation of R&D project applications, innovation and technology transfer, intervention in the scientific and professional communities, as well as coordination and participation in scientific and technological dissemination initiatives.

WORK PLACE

INESC TEC, Porto, Portugal

DUTIES TO BE PERFORMED

The duties to be performed will include: a) design, execution and coordination of R&D, innovation and technology transfer projects; b) identification of new opportunities and fields of action according to the options defined in the strategic plan of INESC TEC; c) R&D teams leadership; d) scientific supervision and post-graduate training of human resources; e) participation in the negotiation and drafting of contracts, specially the multidisciplinary ones.

REQUIRED PROFILE

National, foreigner and stateless candidates holding a PhD degree in Electrical and Computer Engineering, Marine Biology, Geology or related scientific area, and holders of a scientific and professional curriculum showing a relevant profile for the activity to be developed can apply for the tender.

Minimum requirements: PhD.

Preference factors: Experience in the management of European projects in consortium. Experience in coordination and dissemination activities. Knowledge of Mobile Robotics, Marine Technology, environmental monitoring, Marine Biology or Oceanography and other related areas; proficiency in English; ability to interact with national and international companies in the assessment and identification of business opportunities involving INESC TEC's collaboration; participation, including possible responsibility positions, in research and development projects; experience in the conception of applications to national, European and international funding programmes; post-doctoral experience or scientific curriculum after the PhD, compatible with the paying position 2, mentioned above.

FORMALISATION OF THE APPLICATIONS

The applications will be formalised by submitting an electronic form in www.inesctec.pt in the section "Work with us > Research opportunities".

In the same form, each candidate must upload the following documents:

- **Motivation letter** for the job position, addressed to the Chief Executive Officer of INESC TEC, including an **activity and career development plan** for a maximum period of 6 years. The description should reveal the compliance of this plan with INESC TEC's strategy (see Chapter 2 of INESC TEC's Activity Plan for 2019 at https://repositorio.inesctec.pt/bitstream/123456789/8245/4/INESCTEC_activity_plan_2019.pdf) and the duties to be performed and should not contain more than 2000 words and no more than 5 pages;
- **Curriculum Vitae**, highlighting all the higher education, the scientific and technological production, the activities of basic, applied or practice-based research, the activities in collaboration with companies, the activities of extension and knowledge dissemination and the science management activities in the last five years, that the candidate considers more relevant or with greater impact in order to allow the assessment of the corresponding relevance, quality, timeliness and adequacy.

- Copy of certificates or diplomas degree;

The selected candidates with a PhD granted by a foreign higher education institution will have to present, for hiring purposes, the record of the recognition of that degree, issued by the Portuguese Directorate General for Higher Education or by a Portuguese public higher education institution.

The legal framework applicable to the recognition processes required after 1 January 2019 is the one approved by the Decree-Law 66/2018 dated 16 August.

The legal framework applicable to the recognition processes required before 1 January 2019, is the one provided by the Decree-Law 341/2007 dated 12 October and regulated by the Ordinance 227/2017 dated 25 July or, alternatively, the legal framework introduced by the Decree-Law 283/83 dated 21 June, in case the recognition is made through equivalence. Regarding this issue, please consult the website of the Portuguese Directorate General for Higher Education: <https://www.dges.gov.pt/en: Home> > Recognition of Degrees and Diplomas > Foreign Degrees and Diplomas > Recognition of Foreign Degrees and Diplomas.

- Other documents that you consider relevant for the evaluation of the scientific and curricular path.

Candidates who formalise their applications incorrectly or who do not fulfil the demanded requirements will be excluded from the tender.

The jury has the power to require any candidate, if in doubt, to present supporting documents for their statements. The false statements made by the candidates shall be penalised by law.

EVALUATION AND SELECTION PROCESS

The evaluation is carried out in two phases, which will result in a final classification between 0 and 100 points.

First phase: Curricular assessment

The selection is made through the evaluation of the motivation letter, which will include the activity and career development plan, and of the scientific and curricular journey, focusing on the scientific production and professional activity in the **last five years** that **the candidate considers more relevant**. This five year period may be extended by the jury, at the request of the candidate, if reasoned on suspension of the scientific activity for socially protected reasons, namely for parental leave, serious and protracted illness, and other legally protected situations of unavailability for work.

The scientific and professional curriculum of the candidate will be evaluated focusing on the relevance, quality and timeliness of the factors referred to in Article 5 (2) (a) to (d) of the LFSE and of the motivation letter in the subject area(s) of the tender, considering the specific requirements and the adequacy for the duties to be performed.

- F1 - Scientific, technological, cultural or artistic production that the candidate considers more relevant.
- F2 – Applied or practice-based research activities, and technology transfer that the candidate considers with greater impact.
- F3 - Activities of extension and dissemination of knowledge, namely in the promotion of the scientific culture and practices that the candidate considers more relevant.

F4 - Management activities of projects and of science, technology and innovation programmes, or experience in observing, monitoring and evaluating the scientific and technological or the higher education systems in Portugal or abroad. Included here are the activities of preparation and submission of applications for science, technology and innovation projects.

F5 - Motivation letter, including the activity and career development plan, integrated and consistent with the duties to be developed under the strategic project of INESC TEC.

The evaluation of all candidates in the first phase must be completed within a period of no more than one calendar month after the applications are received.

The candidates who have obtained less than 70 points in the average of the curricular assessments of the members of the jury will be considered not approved in absolute merit.

The top five candidates in the average of the curricular assessments that were approved in absolute merit will be qualified for the second phase, consisting of an individual interview, either face-to-face or through videoconference. The interview will weight, at most, 10% of the final classification. The candidates who do not qualify for the second phase will have a classification of 0 in the interview.

Second phase: Interview

In accordance with Article 5(5) of the LFSE, as it stands, the Jury will individually interview each candidate that is qualified to the second phase.

During the interview, the members of the Jury will stimulate an open debate about the quality, the innovative and creative nature, as well as the impact of the research and professional activity of the candidates, considering the requirements and the subject areas of the specific tender procedure.

The interviews will be conducted within a period not exceeding 10 working days after the decision of the Jury.

FUNCTIONING OF THE JURY

Each member of the Jury will assess all the candidates in all the factors from F1 to F5 between 0 and 100 and must present the reasons for the scores attributed. Abstention is not allowed.

The same procedure will apply to the candidates that qualify for the interview.

The candidates who do not qualify for the interview will have 0 points in the second phase.

The curricular assessment (AC) of each candidate is obtained by the weighted average of the factors (Fi) multiplied by the weighting coefficients for the specific position, as provided below, rounded to the nearest tenth.

$$AC = F1*0.2 + F2*0.25 + F3*0.1 + F4*0.25 + F5*0.2$$

The final classification (CF) is obtained by the average of the curricular assessment and the interview (E), multiplied by the weighting coefficients as provided below, rounded to the nearest unit.

$$CF = AC*0.9 + E*0.1$$

After completing the application of the selection criteria, each member of the Jury will sort the candidates according to the final classification assigned to them. Based on this sorting, the Jury will sort the candidates by successive clearance to the first place and following places (each member of the jury follows their personal

sorting). The clearance is carried out when a candidate obtains more than half of the votes. If this doesn't happen in the first voting for a particular place, the least voted candidate is eliminated and the procedure is repeated with the remaining candidates (with tie-breakers based on the average of the final classifications).

The Jury will advise the hiring of the candidate(s) approved in absolute merit according to the previous sorting.

Minutes of the jury meetings shall be drawn up, containing a summary of what has arisen from them, as well as the votes cast by each one of the members and their reasons, and shall be held available on request to the candidates.

SELECTION JURY

In accordance with article 13 of LFSE, the jury is composed of:

President of the Jury: Manuel António Cerqueira da Costa Matos

Full Member: Rui Oliveira

Full Member: Bernardo Almada Lobo

Substitute Member: Manuel Pereira Ricardo

APPLICATION PERIOD

Application period: from 29 July to 30 August

NOTIFICATION OF THE RESULTS, PRELIMINARY HEARING AND FINAL DECISION OF THE RESULTS

The results of the selection process will be disclosed to the candidates by email.

After being notified, the candidates have 10 working days to comment on the results of the selection process under their right to a preliminary hearing. The final decision of the jury will be given within 10 days from the deadline for the decision under the right to a preliminary hearing.

The present tender is exclusively for occupying the indicated vacancies, expiring once the positions are filled.

NON-DISCRIMINATION AND EQUAL ACCESS POLICY

INESC TEC actively promotes a policy of non-discrimination and equal access, so that no candidate can be privileged, benefited, harmed or deprived of any right or exempted from any duty, on basis of origin, age, sex, sexual orientation, marital status, family situation, economic situation, education, social origin or condition, genetic heritage, reduced capacity for work, disability, chronic illness, nationality, ethnic origin or race, region of origin, language, religion, political or ideological convictions and trade union membership.

The candidate with a disability has preference under conditions of equal classification. Candidates must declare on the application form, under word of honour, the respective degree of incapacity, the type of disability and

the means of communication to be used in the selection process, in accordance with the above-mentioned diploma.

The Executive Board of INESC TEC approved this job advertisement in the meeting of 11 July of 2019, also being responsible for the final decision on the hiring.
