Contents

Foreword **xiii**

Preface **xv**

List of Contributors **xix**

1 The Microgrids Concept **1**
Christine Schwaegerl and Liang Tao
1.1 Introduction 1
1.2 The Microgrid Concept as a Means to Integrate Distributed Generation 3
1.3 Clarification of the Microgrid Concept 4
1.3.1 What is a Microgrid? 4
1.3.2 What is Not a Microgrid? 6
1.3.3 Microgrids versus Virtual Power Plants 7
1.4 Operation and Control of Microgrids 8
1.4.1 Overview of Controllable Elements in a Microgrid 8
1.4.2 Operation Strategies of Microgrids 10
1.5 Market Models for Microgrids 12
1.5.1 Introduction 12
1.5.2 Internal Markets and Business Models for Microgrids 15
1.5.3 External Market and Regulatory Settings for Microgrids 19
1.6 Status Quo and Outlook of Microgrid Applications 22
References 24

2 Microgrids Control Issues **25**
Aris Dimeas, Antonis Tsikalakis, George Kariniotakis and George Korres
2.1 Introduction 25
2.2 Control Functions 25
2.3 The Role of Information and Communication Technology 27
2.4 Microgrid Control Architecture 28
2.4.1 Hierarchical Control Levels 28
2.4.2 Microgrid Operators 31
2.5 Centralized and Decentralized Control 32
2.6 Forecasting 35

COPYRIGHTED MATERIAL

2.6.1 *Introduction* 35
2.6.2 *Demand Forecasting* 37
2.6.3 *Wind and PV Production Forecasting* 38
2.6.4 *Heat Demand Forecasting* 39
2.6.5 *Electricity Prices Forecasting* 39
2.6.6 *Evaluation of Uncertainties on Predictions* 40
2.7 Centralized Control 40
2.7.1 *Economic Operation* 41
2.7.2 *Participation in Energy Markets* 42
2.7.3 *Mathematical Formulation* 45
2.7.4 *Solution Methodology* 46
2.7.5 *Study Case* 47
2.7.6 *Results* 48
2.8 Decentralized Control 51
2.8.1 *Multi-Agent System Theory* 52
2.8.2 *Agent Communication and Development* 54
2.8.3 *Agent Communication Language* 59
2.8.4 *Agent Ontology and Data Modeling* 60
2.8.5 *Coordination Algorithms for Microgrid Control* 60
2.8.6 *Game Theory and Market Based Algorithms* 69
2.8.7 *Scalability and Advanced Architecture* 70
2.9 State Estimation 72
2.9.1 *Introduction* 72
2.9.2 *Microgrid State Estimation* 73
2.9.3 *Fuzzy State Estimation* 74
2.10 Conclusions 76
Appendix 2.A Study Case Microgrid 76
References 78

3 Intelligent Local Controllers 81
Thomas Degner, Nikos Soultani, Alfred Engler and Asier Gil de Muro
3.1 Introduction 81
3.2 Inverter Control Issues in the Formation of Microgrids 82
3.2.1 *Active Power Control* 82
3.2.2 *Voltage Regulation* 82
3.3 Control Strategies for Multiple Inverters 82
3.3.1 *Master Slave Control Scheme* 82
3.3.2 *Multi-Master Control Scheme* 83
3.3.3 *Droop Control Implementation in the VSI* 85
3.3.4 *Ancillary Services* 89
3.3.5 *Optional Secondary Control Loops* 90
3.4 Implications of Line Parameters on Frequency and Voltage Droop Concepts 92
3.4.1 *Power Transmission in the LV Grid* 92
3.4.2 *Comparison of Droop Concepts at the LV Level* 93
3.4.3 *Indirect Operation of Droops* 94

3.5 Development and Evaluation of Innovative Local Controls to Improve Stability 98
3.5.1 Control Algorithm 98
3.5.2 Stability in Islanded Mode 100
3.5.3 Stability in Interconnected Operation 107
3.6 Conclusions 115
References 116

4 Microgrid Protection 117
Alexander Oudalov, Thomas Degner, Frank van Overbeeke and Jose Miguel Yarza
4.1 Introduction 117
4.2 Challenges for Microgrid Protection 118
4.2.1 Distribution System Protection 118
4.2.2 Over-Current Distribution Feeder Protection 120
4.2.3 Over-Current Distribution Feeder Protection and DERs 121
4.2.4 Grid Connected Mode with External Faults (F1, F2) 121
4.2.5 Grid Connected Mode with Fault in the Microgrid (F3) 123
4.2.6 Grid Connected Mode with Fault at the End-Consumer Site (F4) 124
4.2.7 Islanded Mode with Fault in the Microgrid (F3) 124
4.2.8 Islanded Mode and Fault at the End-Consumer Site (F4) 124
4.3 Adaptive Protection for Microgrids 125
4.3.1 Introduction 125
4.3.2 Adaptive Protection Based on Pre-Calculated Settings 126
4.3.3 Microgrid with DER Switched off, in Grid-Connected Mode 129
4.3.4 Microgrid with Synchronous DERs Switched on in Grid Connected and Islanded Modes 134
4.3.5 Adaptive Protection System Based on Real-Time Calculated Settings 140
4.3.6 Communication Architectures and Protocols for Adaptive Protection 144
4.4 Fault Current Source for Effective Protection in Islanded Operation 146
4.5 Fault Current Limitation in Microgrids 151
4.6 Conclusions 154
Appendices: 154
4.A.1 A Centralized Adaptive Protection System for an MV/LV Microgrid 154
4.A.2 Description of the Prototype FCS 161
References 164

5 Operation of Multi-Microgrids 165
João Abel Peças Lopes, André Madureira, Nuno Gil and Fernanda Resende
5.1 Introduction 165
5.2 Multi-Microgrid Control and Management Architecture 167
5.3 Coordinated Voltage/var Support 169

5.3.1 *Introduction* 169
5.3.2 *Mathematical Formulation* 169
5.3.3 *Proposed Approach* 171
5.3.4 *Microgrid Steady-State Equivalents* 172
5.3.5 *Development of the Tool* 173
5.3.6 *Main Results* 174
5.4 Coordinated Frequency Control 178
5.4.1 *Hierarchical Control Overview* 178
5.4.2 *Hierarchical Control Details* 181
5.4.3 *Main Results* 183
5.5 Emergency Functions (Black Start) 186
5.5.1 *Restoration Guidelines* 187
5.5.2 *Sample Restoration Procedure* 189
5.6 Dynamic Equivalents 192
5.6.1 *Application of Dynamic Equivalence Based Approaches to Microgrids* 193
5.6.2 *The Microgrid System Definition* 194
5.6.3 *Developing Micogrid Dynamic Equivalents* 195
5.6.4 *Main Results* 200
5.7 Conclusions 202
References 203

6 Pilot Sites: Success Stories and Learnt Lessons 206
George Kariniotakis, Aris Dimeas and Frank Van Overbeeke (Sections 6.1, 6.2)
6.1 Introduction 206
6.2 Overview of Microgrid Projects in Europe 206
6.2.1 *Field Test in Gaidouromandra, Kythnos Microgrid (Greece): Decentralized, Intelligent Load Control in an Isolated System* 208
6.2.2 *Field Test in Mannheim (Germany): Transition from Grid Connected to Islanded Mode* 218
6.2.3 *The Bronsbergen Microgrid (Netherlands): Islanded Operation and Smart Storage* 222
References 231
6.3 Overview of Microgrid Projects in the USA 231
John Romankiewicz, Chris Marnay (Section 6.3)
6.3.1 *R&D Programs and Demonstration Projects* 232
6.3.2 *Project Summaries* 236
References 248
6.4 Overview of Japanese Microgrid Projects 249
Satoshi Morozumi (Section 6.4)
6.4.1 *Regional Power Grids Project* 249
6.4.2 *Network Systems Technology Projects* 257
6.4.3 *Demonstration Project in New Mexico* 258

6.5 Overview of Microgrid Projects in China 262
Meiqin Mao (Section 6.5)
6.5.1 Microgrids on Islands 262
6.5.2 Microgrids in Industrial, Commercial and Residential Areas 264
6.5.3 Microgrids in Remote Areas 268
References 269
6.6 An Off-Grid Microgrid in Chile 270
Rodrigo Palma Behnke and Guillermo Jiménez-Estévez (Section 6.6)
6.6.1 Project Description 270
6.6.2 Demand-Side Management 272
References 274

7 Quantification of Technical, Economic, Environmental and Social Benefits of Microgrid Operation 275
Christine Schwaegerl and Liang Tao
7.1 Introduction and Overview of Potential Microgrid Benefits 275
7.1.1 Overview of Economic Benefits of a Microgrid 275
7.1.2 Overview of Technical Benefits of a Microgrid 277
7.1.3 Overview of Environmental and Social Benefits of a Microgrid 277
7.2 Setup of Benefit Quantification Study 278
7.2.1 Methodology for Simulation and Analysis 278
7.2.2 European Study Case Microgrids 279
7.3 Quantification of Microgrids Benefits under Standard Test Conditions 285
7.3.1 Definition of Standard Test Conditions 285
7.3.2 Balancing and Energy Results 285
7.3.3 Technical Benefits 287
7.3.4 Economic Benefits 289
7.3.5 Environmental Benefits 291
7.3.6 Reliability Improvement 293
7.3.7 Social Aspects of Microgrid Deployment 296
7.4 Impact of External Market Prices and Pricing Policies 296
7.4.1 Sensitivity Analysis 296
7.4.2 Sensitivity of Energy Balancing in Response to External Market Prices and Price Settings 298
7.4.3 Sensitivity of Technical Benefits (Losses) in Response to External Market Prices and Price Settings 300
7.4.4 Sensitivity of Economic Benefits in Response to External Market Prices and Price Settings 301
7.4.5 Sensitivity of Environmental Benefits in Response to Market Prices and Price Settings 302
7.5 Impact of Microgrid Operation Strategy 303
7.6 Extension to European Scale 307
7.7 Conclusions 310
References 313
